SUMMARY

Data Analyst with 3 years of experience in SQL, Python, and Tableau. I turn raw data into clear, revenue-driving insights dashboards that save teams hours of manual work. MSc in Big Data and Business Analytics.

EXPERIENCE

Data Analyst Intern

ShopTheNoir

June 2025 - December 2025, France

- Built Tableau & Metabase dashboards tracking 15+ KPIs, reducing reporting turnaround time by 30% and improving visibility into sales and inventory performance.
- Analyzed sales and margin performance across 200+ products using Git-versioned SQL scripts, contributing to a 12% increase in category revenue.
- Partnered with Marketing, Inventory, and Pricing teams to translate data insights into profitable inventory and campaign decisions.

Data Analyst

Prospkt

October 2023 - November 2023, France

- Analyzed 5M+ prospect records using SQL and Python, enabling sales teams to prioritize high-value leads through interactive Tableau dashboards.
- Built self-service Metabase dashboards and analytics-ready datasets, reducing ad-hoc reporting requests across departments by 30%.
- Automated data prep workflows (dbt, Airflow, Git) and maintained clean reporting schemas, reducing manual Excel reporting effort by 30%.

Data Analyst Intern

13S Research Lab

April 2023 - August 2023, France

- Built Grafana and Tableau dashboards to monitor machine learning performance and operational KPIs, providing real-time visibility into experiment progress.
- Performed time-series analysis using Python to identify performance trends and anomalies, optimizing data models via dbt.
- Automated data collection and preprocessing using Git-controlled Airflow workflows, improving data quality for research analysis and reporting.
- Analyzed experimental results and presented actionable insights to research teams, supporting data-driven decisions for model improvement and resource planning.

Application Development Analyst

Accenture

December 2020 - August 2022, India

- Analyzed SAP S/4HANA sales, profit & emissions data with SQL & Python to uncover trends that guided executive strategic decisions.
- Built Tableau and Metabase dashboards for AES LATAM showing 20+ KPIs (sales, profitability, plant ops) — enabling faster leadership decisions.
- Applied time-series forecasting to CO₂ emissions data, projecting long-term sustainability trends using a scalable, Git-versioned dbt pipeline.
- Delivered clear, actionable insights to senior leadership, directly supporting regional plant expansion and ESG sustainability initiatives.

PROJECT

Hospital Analytics

Personal Project • ashwini-choudhary1.github.io/ashwini-portfolio/hospital-analytics.html

- End-to-End Medical Architecture platform with Docker, dbt, Airflow, Metabase, and CI/CD.

Olist 360: From Data to Decisions

Personal Project • ashwini-choudhary1.github.io/ashwini-portfolio/olist.html

- Analyzed 115K+ orders (Python, Tableau) to predict churn, evaluate pricing, and deliver data-driven revenue recommendations.

EDUCATION

MSc Big Data and Business Analytics

CYCergy Paris Université • Paris • 2024-2025

SKILLS

Python, SQL

Airflow, Dbt, Metabase, Tableau, Power BI, Excel

Pandas, Scikit-Learn, SAP, Docker, Google GCP, SAP S/4 HANA
