Education

Cergy Paris Université March 2026
Master's in Big Data and Business Analytics (Grade: 14.9/20) *Paris, France*

Experience

Data Analyst August 2025 – March 2026
ShopTheNoir – Internship *France*

- Built Power BI dashboards tracking 15+ KPIs, reducing reporting turnaround time by 30% and improving visibility into sales and inventory performance.
- Applied machine learning models to translate customer purchase insights into profitable inventory and campaign decisions.
- Analyzed sales and margin performance across 200+ products using SQL and Python under Git version control, contributing to a 12% increase in category revenue.

Data Analyst October 2023 – February 2024
Prospkt – Freelance *France*

- Analyzed 5M+ prospect records using SQL and Python, enabling sales teams to prioritize high-value leads through interactive dashboards.
- Applied AI and machine learning anomaly detection to filter fraudulent traffic and generate verified leads for the platform.
- Built self-service Power BI dashboards and analytics-ready datasets, reducing ad-hoc reporting requests across departments by 20%.
- Automated data preparation workflows (dbt, Airflow, Git) and maintained clean reporting schemas, reducing manual Excel reporting effort by 25%.

Data Analyst April 2023 – August 2023
I3S Research Lab – Internship *France*

- Built Grafana and Tableau dashboards to monitor machine learning performance and operational KPIs, providing real-time visibility into experiment progress.
- Performed time-series and anomaly analysis using Python to identify experimental performance trends, optimizing data models via dbt.
- Automated data collection and preprocessing using Git-controlled Airflow workflows, improving data quality for research analysis and reporting.
- Analyzed experimental results and presented actionable insights to research teams, supporting data-driven decisions for model improvement and resource planning.

Application Development Analyst December 2020 – August 2022
Accenture – Full time *India*

- Built Power BI dashboards for AES LATAM tracking 20+ KPIs (sales, profitability, plant operations), enabling faster executive decision-making.
- Applied machine learning to forecast CO_2 emissions data, projecting long-term sustainability trends using a scalable, Git-versioned dbt pipeline.
- Built Metabase dashboards for sales, profit, and emissions data with SQL and Python to uncover trends that guided strategic decisions.

Projects

FinShield AI | *SQL, Python, Metabase, Tableau, dbt, XGBoost, FastAPI* Live Link
Hospital Analytics | *SQL, Python, Git CI/CD, Metabase, dbt, Airflow* Live Link

Technical Skills

Languages: SQL, Python, R
BI & Visualization: Power BI, Tableau, Metabase, Grafana, Advanced Excel
Data Engineering & ML: dbt, Apache Airflow, GCP, Git CI/CD, scikit-learn, XGBoost
